ANUSHA B

AI Engineer | Generative AI | AI Systems Engineering

+91 6381260652 anushalathaaa7@gmail.com portfolio | LinkedIn | Github

SUMMARY

AI Engineer focused on building production-oriented AI applications and intelligent systems, with experience in Generative AI, RAG pipelines, LLM integration, and agentic workflows. Improved RAG answer relevance from 41.4% to 71.1% and citation correctness from 90% to 100% across 30 benchmark cases. Developed AI evaluation and reliability systems with 86 backend tests passing, demonstrating strengths in Python, FastAPI, system integration, evaluation, and observability.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, TypeScript, C, C++

Generative AI & LLMs: LLM Integration, RAG, AI Agents, Tool Calling, Prompt Engineering, LangChain, LangGraph, LlamaIndex

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost, LightGBM, Model Evaluation

Backend & Frontend Development: FastAPI, Node.js, Express.js, React.js, REST APIs, Tailwind CSS, Pydantic

Databases & Vector Search: PostgreSQL, MongoDB, Qdrant, Supabase

Cloud, DevOps & Tools: Docker, Docker Compose, Git, GitHub, CI/CD, Postman, MLOps, Deployment & Monitoring

WORK EXPERIENCE

Full Stack Developer - Point Pikkers **Jan 2026 - May 2026**

- Developed scalable full-stack applications using React, TypeScript, and backend services.
- Built RESTful APIs and backend logic for efficient data flow and AI module integration.
- Worked with SQL and NoSQL databases while collaborating on scalable system design.

AI / ML Developer Intern- OneYes Infotech Solutions **May 2025 - Aug 2025**

- Built and deployed machine learning models using FastAPI-based backend services.
- Developed API endpoints for AI model integration into web applications.
- Performed feature engineering, model evaluation, and system optimization.

PROJECTS

KnowledgeOps — AI Knowledge Infrastructure & RAG Platform | React, TypeScript, FastAPI, Gemini, Qdrant, Docker

- Engineered a multi-document RAG platform with semantic retrieval, MMR reranking, grounded generation, and citation validation across 30 benchmark cases spanning 6 technical domains.
- Improved Answer Relevance from 41.4% to 71.1%, MRR from 0.925 to 0.950, and Citation Correctness from 90% to 100%; achieved 100% Retrieval Hit Rate and Groundedness on the benchmark.

ReliAI — AI Evaluation & Reliability Platform | Python, FastAPI, PostgreSQL, React, TypeScript, Docker

- Developed a persistent AI evaluation platform supporting dataset management, automated metrics, execution tracing, and evaluation run comparisons.
- Implemented threshold-based regression detection, bulk dataset imports, and HTTP-based project evaluation; achieved 86 passing backend tests in the latest reported verification.

FlowMind — AI Workflow Orchestration & Monitoring Platform | React, TypeScript, FastAPI, Gemini, Groq, Docker

- Developed an AI workflow orchestration platform integrating AI agents, multiple LLM providers, and tool-based execution to support configurable multi-step AI workflows.
- Built an interactive dashboard for workflow execution, status tracking, and operational monitoring, connecting frontend components with backend APIs.

ArchMind — AI System Architect | Python, Streamlit, LLMs, Pydantic

- Engineered an LLM-powered assistant that transforms natural-language product requirements into structured technical architecture proposals with system component and technology recommendations.
- Implemented structured JSON generation and Pydantic validation to produce consistent architecture specifications covering scalability, technology selection, and architectural trade-offs.

EDUCATION

B.Tech – Artificial Intelligence & Data Science **June 2022 - May 2026**

DMI College of Engineering, Chennai |CGPA: 8.77/10

ACHIEVEMENTS & PUBLICATIONS

- Published Research Paper: AI-Driven Personalized Fashion: Virtual Try-On, Smart Resale Authentication, and Sustainability Ranking, IJREAT, Vol. 13, Issue 2, 2025.
- Published Research Paper: A Hybrid Reality-Aware and Swarm Intelligent Architecture for Advanced Conversational Systems, IJET, Vol. 12, Issue 2, 2026.
- Top 5 Finalist – All India Women's Hackathon, recognized for developing an impactful technology-driven solution.
- First Prize – Codeathon, recognized for developing an innovative software solution through technical excellence, effective collaboration, and problem-solving.
