SUMMARY

AI Engineer with hands-on experience in machine learning, deep learning, Generative AI, RAG systems, and AI application development. Experienced in building ML pipelines, LLM-powered applications, document retrieval systems, and AI APIs using Python, FastAPI, TensorFlow/PyTorch, and modern AI frameworks. Skilled in integrating AI models with scalable backend services, vector databases, and production-ready applications. Strong foundation in NLP, embeddings, model evaluation, and intelligent automation.

TECHNICAL SKILLS

AI & Machine Learning: Python, Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG, Embeddings, Model Evaluation, Feature Engineering
AI Frameworks: TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM
LLM / GenAI: LLM Integration, Prompt Engineering, RAG, Vector Search, FAISS, LangChain
Backend & APIs: FastAPI, Python, Node.js, REST APIs
Databases: MongoDB, PostgreSQL, SQL, Supabase
Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS
Tools & Deployment: Git, GitHub, Docker, Streamlit, VS Code, Postman
AI Concepts: CNN, RNN, LSTM, Transformers, Classification, Regression, Clustering

WORK EXPERIENCE

Full Stack Developer - Point Pikkers

Jan 2026 - April 2026

- Developed scalable full-stack applications using React, TypeScript, and backend services.
- Built RESTful APIs and backend logic for efficient data flow and AI module integration.
- Worked with SQL and NoSQL databases while collaborating on scalable system design.

AI / ML Developer Intern- OneYes Infotech Solutions

May 2025 - Aug 2025

- Built and deployed machine learning models using FastAPI-based backend services.
- Developed API endpoints for AI model integration into web applications.
- Performed feature engineering, model evaluation, and system optimization.

PROJECTS

AI Fashion – Personalized Fashion Intelligence Platform

- Engineered an AI-driven fashion intelligence pipeline integrating visual understanding, personalized recommendations, virtual try-on, resale authentication, and sustainability scoring.
- Applied computer vision and ML techniques to extract fashion attributes and generate context-aware product recommendations.

Smart Athlete – AI-Based Performance Analytics

- Developed an AI-powered performance analytics system to transform athlete activity data into predictive performance insights and actionable training recommendations.
- Implemented ML-driven performance analysis to identify behavioral patterns, evaluate key metrics, and support data-informed decision making.

Employee Performance Dashboard

- Architected a full-stack analytics platform combining secure role-based access, REST APIs, centralized data management, and real-time KPI monitoring.
- Integrated SQL and MongoDB pipelines to deliver interactive performance analytics and data-driven reporting.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

June 2022 - May 2026

DMI College of Engineering, Chennai | CGPA: 8.77/10

ACHIEVEMENTS & PUBLICATIONS

- Published Research Paper: AI-Driven Personalized Fashion: Virtual Try-On, Smart Resale Authentication, and Sustainability Ranking, IJREAT, Vol. 13, Issue 2, 2025.
- Published Research Paper: A Hybrid Reality-Aware and Swarm Intelligent Architecture for Advanced Conversational Systems, IJET, Vol. 12, Issue 2, 2026.
- Top 5 Finalist – All India Women's Hackathon, recognized for developing an impactful technology-driven solution.
- First Prize – Codeathon, recognized for developing an innovative software solution through technical excellence, effective collaboration, and problem-solving.
